DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

Event name : Waste Management

Date of Event : 22-11-2024

Venue : Architecture Seminar Hall

Number of participants : 90

Targeted Audience : III Semester, Dept of AI&DS, Dept of Mech, Dept of Civil

Objective : To develop and implement effective waste management strategies that promote sustainable practices, and encourage recycling, reuse, and responsible disposal of waste to create a cleaner and healthier environment for future generations.

DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

Department of Artificial Intelligence and Data Science in association with Mechanical department organized a talk on “**Waste management** ” for III semester AI&DS, Mechanical and Civil students .

Workshop Objective:

The objective of this report is to highlight the significance of efficient waste management in addressing environmental and societal challenges. It aims to explore various types of waste, methods for their sustainable management, and the role of recycling, reuse, and composting in reducing the ecological footprint. By identifying key challenges and innovative solutions, the report seeks to promote awareness and encourage the adoption of responsible waste disposal practices. Additionally, it emphasizes the importance of government policies, community involvement, and individual action in achieving a cleaner, healthier, and more sustainable future for generations to come.

Resource Person:

D.R. Kumaraswamy is a former chief environment officer, Karnataka state pollution control board and director of Prakruthi institute of environment studies. He is the Chairman of the Board, which is responsible for implementing the policies and programs aimed at controlling and preventing pollution in the state of Karnataka, India. Under his leadership, the Board has been actively involved in various initiatives to mitigate pollution and promote sustainability.

Feedback:

Feedback from student about the workshop is positive
