DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

Department of Artificial Intelligence and Data Science organized workshop on “**Think about Thinking**” for VII Semester students. It was conducted in association with **MBA Department**.

Workshop Objectives:

The "**Think About Thinking**" session is designed to provide final-year students with a transformative experience that goes beyond academic learning to focus on the development of critical cognitive skills. The objective is to help students understand the mechanics of their own thought processes, enabling them to identify cognitive biases, challenge existing assumptions, and adopt a more strategic approach to problem-solving and decision-making.

By engaging in hands-on activities and real-world tasks, students will be encouraged to reflect on how their thinking shapes their actions, choices, and long-term outcomes. The session aims to cultivate self-awareness, innovative thinking, and adaptability—qualities essential for navigating complex challenges in their academic, professional, and personal lives.

With guidance from expert speakers, students will explore practical tools and techniques to enhance critical thinking, build confidence in decision-making, and embrace a growth mindset. The ultimate goal is to equip students with the intellectual framework and strategic skills needed to excel in their future endeavors, whether pursuing advanced studies, embarking on a professional career, or striving for personal development.

Resource Person:

Prof. Manjunath S, Associate Professor & Head of MBA and Prof. Manjunath TK, Associate Professor & Head of AI & DS. Together, they bring a unique blend of management and technical expertise, ensuring a holistic and engaging session that empowers students with critical skills for academic, professional, and personal success.

Feedback:

Feedback from student is positive.
