## Department of Computer Science and Engineering

### Academic Audit Conduct Mechanism:

The auditing process in the Department of Computer Science and Engineering is structured to ensure continuous improvement and accountability. The department undergoes internal audit once in a semester by two senior faculties from the department and it focuses on evaluating the individual faculty course file and personal files. The department also undergoes external audit once in a year by academicians from sister institutions and it aims to provide an external perspective on the department's performance and adherence to academic standards.

Audit observations from the internal audit and external audit are placed before the Department Advisory Committee (DAC) for its implementation. The DAC discusses about the observations and if found necessary, then it is placed before the Program Assessment Committee (PAC) for its approval. Further, the PAC discusses on the observations and if found necessary, then it gives approval for DAC for its implementation.
