World Environment Day (5th June)

History

On 5th June 1974, the first World Environment Day was celebrated. The topic taken up for the day was "Only One Earth". Since 1974, World Environment Day has been in celebration annually till today.

Importance

The significance that World Environment Day holds is huge. There is an urgent need to save and protect the environment. The reason why the Environment is in shambles today is that for times memorial human beings have been misusing the resources and inflicting irreparable damage upon it.
